REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 1-15 is the inclusion of a developer containment portion with a first portion to contain the developer and a second portion adjacent to the first portion having an opening to deliver the developer to the developer hopper; and a first cover disposed adjacent the second portion of the developer containment portion and positionable between an open position for delivery of the developer and a closed position for preventing delivery of the developer. This is found in all of claims 1-15, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 16 is the inclusion of a first cover means disposed adjacent the means for delivering the developer and positionable in a first direction between an open position for delivery of the developer and a closed position for preventing delivery of the developer and the first cover means configured to move in a second direction different than the first direction during movement between the open and closed positions. This is found in all of claim 16, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 17 is the inclusion of a method of directly moving a first cover along a first direction from a closed position for no delivery of the developer to an open position for delivery of the developer; and indirectly moving a second cover in contact with the developer along the first direction from the closed position to the open position. The movement of the second cover is done by way of the first cooperating features of the first and second covers after the first cover has been

moved a distance in the first direction. This is found in all of claim 17, but not disclosed nor suggested by the prior art of record.

The primary reason of allowance of claims 18-22 is the inclusion of a method of directly moving a first cover along a first direction from a closed position for no delivery of the developer to an open position for delivery of the developer; and indirectly moving a second cover in contact with the developer along the first direction from the closed position to the open position. The movement of the second cover is done by way of the first cooperating features of the first and second covers after the first cover has been moved a distance in the first direction. This is found in all of claims 18-22, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
